

Method comparison — distribution, degradation curves, and relative improvement heatmap

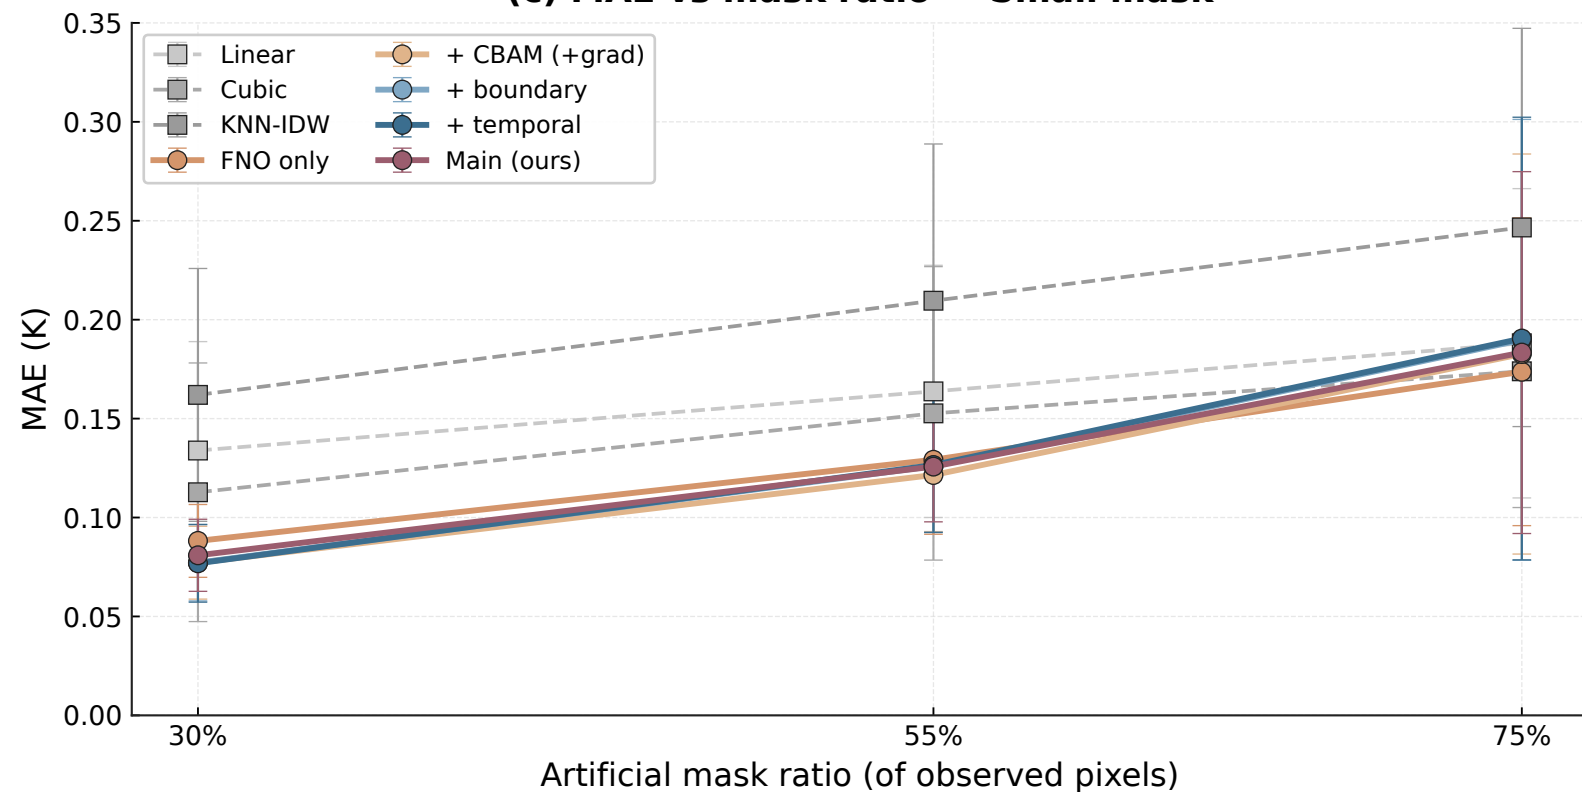

(a) Per-sample MAE distribution — Small mask (10-50 px)

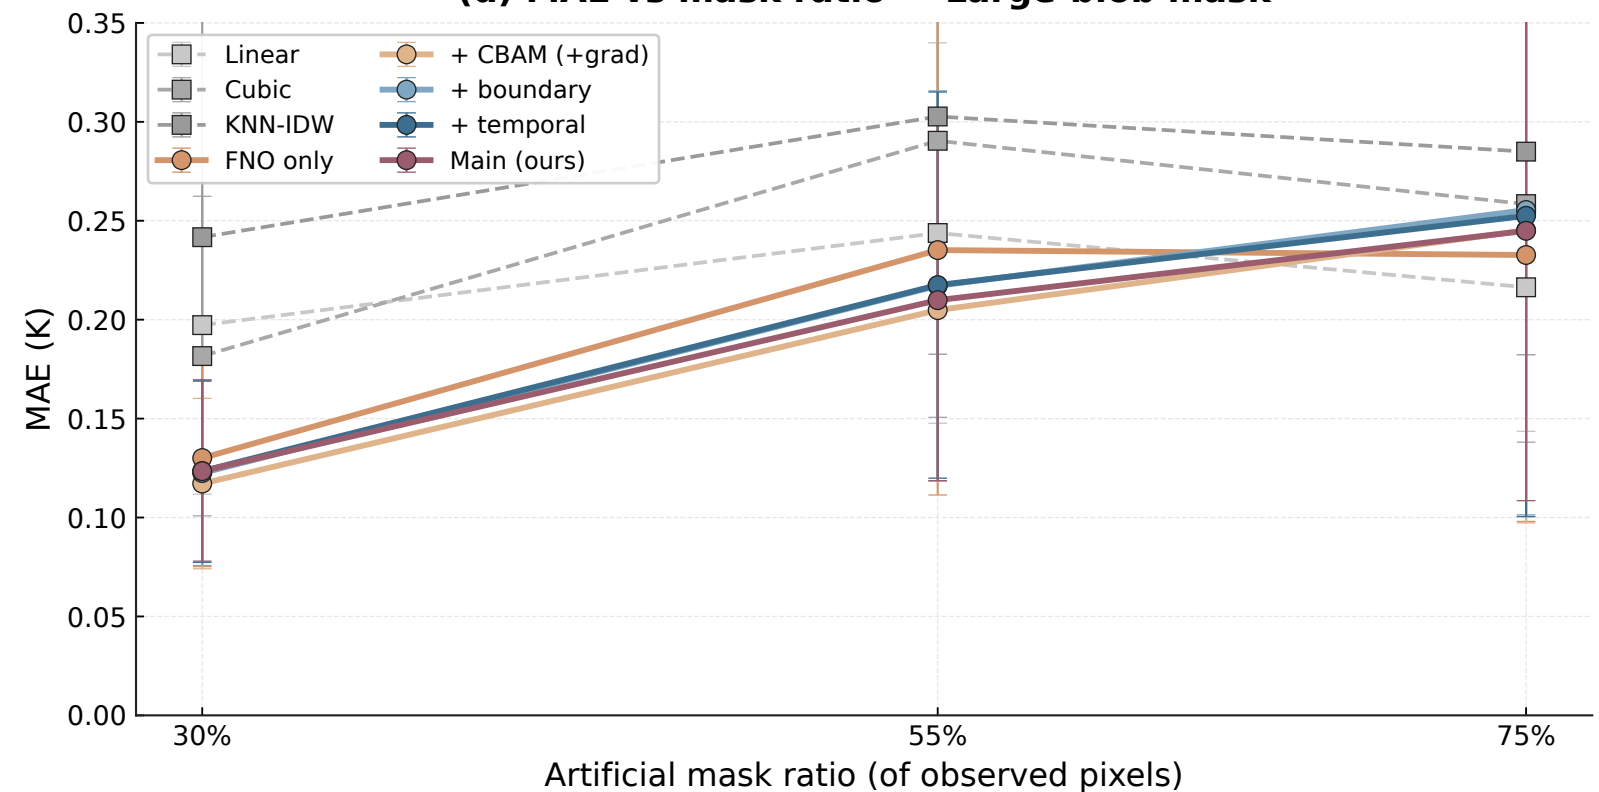

(b) Per-sample MAE distribution — Large-blob mask (80-200 px)

(c) MAE vs mask ratio — Small mask

(d) MAE vs mask ratio — Large-blob mask

(e) Relative MAE reduction vs Cubic baseline (%) — green: method is better, red: worse
